TEMPERANCE IN SUFFOLK.—We learn from a friend, whose letter is too long to publish, that a meeting of the Suffolk Co. Temperance Society was held at Cutchogue on the 21st and 22d inst. About 150 delegates were present including some twenty clergymen of different denominations. Very encouraging reports were received from the affiliated Societies, and it was thought to be a cause of satisfaction that a member of Assembly pledged to the Maine Law as well as a Teetotal Sheriff. Appropriate resolutions were discussed and adopted, and addresses in favor of total abstinence delivered. A highly respectable delegation was appointed to attend the meeting of the State Temperance Society at Albany on Jan. 18, 1853. The next meeting of the Suffolk Co. Society is to be at Islip on the 4th Tuesday of the same month. The Temperance people of the County are doing a good work; they are forming auxiliary societies in different localities and will put forth every effort to secure the Maine Law and enforcement of the Maine Law.

NEW-YORK TRIBUNE.

NEW-YORK, WEDNESDAY, DEC. 29.

For Europe.

The next number of *The Tribune* for Europe, an Circulation will be issued THIS MORNING, at 9 o'clock. It will contain all the Latest News up to the time of going to press. Single copies, in wrappers, ready for mailing, can be had at the desk. Price Six Cents. The Africa sails from this port To-day at 10 o'clock.

CONGRESS.—The only matter worthy of note in the Senate yesterday, was a resolution offered by Mr. Cass, in relation to the violation of the Treaty of Washington, of July 4, 1850, by the establishment of a new British Colony in Central America.

In the House the question of remitting duties upon certain goods destroyed by fire in New-York, was discussed for a time, and nothing was done about it, when that body adjourned.

The lecture before the Mechanics' Institute last night, was by Hon. JOHN A. DIX, upon "The Effects of Government upon the Laboring Classes." The attendance was rather small.

Wm. H. FAY's fifth lecture on "Music" was given last night, at Metropolitan Hall, to a considerable audience. His remarks and illustrations had reference particularly to "The Voice."

Rev. W. W. Patten delivered "The People's Lecture" last night before a fair house, at the Tabernacle. His text was, "The Martyrs of Yesterday the Heroes of Today." He was well received.

Rev. THOMAS STARR KING, of Boston, gave the Seventh of the New-England Course of Lectures, in Brooklyn, last night, to a full house. "Socrates" was the subject of his remarks, whom the speaker characterized as "not so much of a Philosopher as a Home Missionary."

NEW LORDS AT ALBANY.—The political revolution for some time in progress will be consummated in our State on Tuesday of next week by the assembling of a strongly Democratic Assembly at Albany.

The Governor, Lieutenant Governor, Canal Board, Heads of Departments, Legislature (for the Senate is united against us by the Lieut. Governor) will henceforth be, at least through the ensuing year, and most of them for two years, of politics adverse to ours, and backed by a popular majority so commanding as to give strong assurance of stability.

Yet it would be most unwise for our new rulers to fancy themselves lifted above the chances, or even the probabilities, of downfall. On the contrary, they have been waded to power by a concurrence of favoring gales which even they can hardly hope to find blowing so fairly and freshly a second time. They can hardly hope to have the sympathy and aid of Whig Hunkerism and Democratic Free Soilism in any subsequent struggle. They can hardly expect again to pile up their extra majorities of 52 in the Anti-Enlargement Counties and at the same time poll an outside party vote in the Canal region. They will hardly be able again to combine perfectly such discordant elements as are implied in the running of Seymour, Church and Follett on the same State Ticket. Throughout the late contest, the Whigs were widely and effectively assailed as the authors of the famous Canal Contracts made at Albany one year ago, although no Whig in nomination had borne any part in making those Contracts, while Mr. Commissioner Follett, running for reelection on the Pierce and King ticket, had been one of their foremost contrivers and defenders at the Canal Board. We do not think the combined address of Seymour and Aaron Ward, Crosswell and John Van Buren, could make that "saw" work again.

"Indeed, we presume the shrewd magnates of the party" understand that their position is critical, and that the acts which achieved will not suffice to fortify and retain it. Gov. Seymour is a man of good personal standing, popular manners, fair talents and ample fortune; and these have gone far toward achieving a position which they will need reinforcements to maintain. He has seen fit to traverse the Canal portions of the State and volunteer pledges that the "More Speedy Enlargement" should, in case of his triumph, be pushed vigorously to a completion. The Canal men have taken him at his word; his majority exceeds his wildest anticipatory boast; his backing in the new Assembly is ample, and his plans for pressing on the Enlargement, whatever their nature, will meet with little resistance from the dying remnants of the routed Whig party; while, should they promise to accomplish their professed object, they will probably meet a warmer and more unanimous support from our side than from his own. There is no Judicial dodge now practicable, like that which covered without conceding, save from the eyes of the wilfully blind, the great swindle of 1851, and the two years of Gov. Seymour's present term, must see the great enterprise well under way, or no device can avail to reflect him in 1854. The People will infer from what will then have been what is to be, and cannot be longer deluded by promises.

The Canal Policy of what claims to be Democracy in our State has been most calamitous to New-York, and hardly less so to the Great West lying beyond it. Had the counsels and plans of Gov. Seward and his advisers been vigorously and consistently followed by his successors, the Erie Canal would have been long since the noblest artificial channel in the known world, yielding a gross revenue of Four to Five Millions per annum, and swelling the trade of our City to an extent unparalleled in history. Our State Debt would have been less this day, with the Enlarged Canal completed in 1845, than it now is with nearly half the work still to do, and none of its advantages yet realized. There is not a bushel of grain grown on a Western farm, there is not an acre of land between Syracuse and Dubuque, that would not have been considerably increased in value from the date of the completion of our Grand Canal. But Tyler's treachery distracted the Whigs in '41-'2, and the wholesale villainy of State Repudiation in the West and South-West depressed the credit of solvent as well as bankrupt States, until the money-lenders and stockjobbers—always a faithless and short-

sighted race—fancied they could promote their personal ends by bringing Loco-Focoism into power and stopping our Public Works. The conflagration of 1835, that burned nearly all our City below Wall-st., was by no means so great a public calamity as that stoppage of the Canal Enlargement.

Well, Gov. Seymour is not Gov. Bouck; and we do not think the career and subsidence of the latter functionary has for him any profound attraction. We believe Gov. S. realizes that our State has lost very much by the foolish and factious "Stop Policy," and that, while some part of it has sought or created new channels, and can never be recalled to our Grand Canal, there is very much more which can be and should be. We trust he will in good faith suggest and with energy press some practical plan whereby the Enlargement may be completed within the four years that he may reasonably hope to fill the Executive Chair. Should he do this, he will honorably link his name with one of the noblest achievements in the history of human effort for the advancement and well-being of the Race.

The new Legislature contains few Members of Legislative experience and distinction, but many men of whom report speaks favorably. We shall have to look to the future, if not to the present, for the advancement and well-being of the Race.

FREEDOM AND HONESTY.—La Verdad, the organ of the Cuban Junta in this City, in an article which we copy in another column, does us the honor to propound a question or two and to ask for a distinct reply. The questions are: 1. Whether it is wrong in a Republican Government to forbid its citizens from helping another people to achieve their freedom? and 2. Whether an American Republic ought to maintain such a neutrality act of 1818, in order to uphold a foreign hostile despotism on her border?

These queries relate of course, to the case of Cuba, whose sons we are told we ought to rescue from Spanish oppression, despite the "Comity of nations," as we would snatch a poor fellow from the clutches of robbers or the jaws of a tiger. Here is our reply:

1. A republican government ought to restrain its citizens in the case mentioned if it is under obligations so to do by the express stipulations of treaties solemnly contracted and ratified. Such obligations the United States now sustain toward Spain. They may be impolitic, inconsistent, wrong. If so, let the nation be persuaded thereof and annul them. Nothing can be more within the right of any citizen than to put forth that proposition, to discuss and defend it, and finally, to take the sense of the people thereon. If the decision should be in favor of withdrawing the pledges and agreements in question, our Government would then notify the Spanish Government of the fact and our obligations would honorably and fairly cease. But until this is done, we are held by them in the eyes of the world and of history, and none but second-rate would seek to have the nation prove false to their sanctions. Above all, the cause of freedom and humanity ought not to be, and cannot truly be, served by the national treachery and the dishonor of the American people.

2. So of the neutrality act. If that is a bad law, arraign it before the tribunal of public opinion and demand its repeal. The party understood to be specially opposed to its operation expect to come into control of all departments of the Government very soon. You can then agitate for its repeal with the best prospects of carrying your point. But as long as it stands on the statute-book the officers of the Government have nothing to do but to enforce it. As for the character of the Act, we understand it to provide merely for the execution of treaties. So the question comes back to the annulling of the treaties and the proclamation to all the world that America will not have friendly relations with any despot or unjust power. All that we contend for at present is, that everything shall be done decently and above board, and not after the fashion of burglars and sheep thieves.

—Is it necessary to repeat that the Cuban question is not by any means so simple and easy of solution as the writers of *La Verdad* imply. It is dominated and complicated by a people of some hundred thousands, like the creoles of Cuba, to talk of freedom, oppression, the rights of man and the woes of bondage, when they persist in enslaving and embroiling another people of three quarters of a million! Let the Cuban patriots make negro emancipation an article in their creed, and the civilized world will begin to listen with respect to their appeals in behalf of freedom and human rights.

BROADWAY RAILROAD STOPPED.—The result which we long ago predicted in regard to this gigantic project is at last a matter of fact. Judge Campbell, of the Superior Court, has issued a temporary injunction, ordering a cessation of proceedings in the matter until cause shall be shown by both parties, and the question decided whether the injunction shall be vacated or remain perpetual. Of course the matter will go over to the New Year, when—if the injunction should be vacated—it will have to pass the Aldermen, (which of course is easy enough, as they will be the same as now,) the new Board of Assistants, and the new Mayor; so, in any event, the Broadway Railroad cannot be legally chartered probably before March or April.

By the way, why should not this remedy be employed in relation to other acts of the Common Council? Why should not an injunction be obtained preventing henceforth the payment of any money whatsoever from the City Treasury, until the secret bargains, the private bills, and all the deep-laid schemes of robbery perpetrated during the year shall have been dragged into light? It ought not to be possible that the Common Council should increase the expenses of the City at the rate of a million of dollars per annum, running up the taxes in certain departments more than a hundred per cent. over the previous year, and yet the people have no power to discover how it was done, or who has got the plunder. Thus far, the present Council have baffled investi-

gation by refusing to put on record the items in their bills, as in the instance of the profligate Tea-room expenses, which—as soon as we began to publish the "items"—they ordered to be paid in the lump, offering no vouchers except the Keeper's word that the amount was "all right." If the power of injunction can arrest the Broadway Railroad, it can stop the frightful stream of money flowing from the treasury into the pockets of the Aldermen and their favorites; and the sooner that power is applied, the lighter will be our taxes for 1853.

It is stated that Mr. Gisborne has put down a submarine telegraph from Cape Town to New Brunswick, across Northumberland Strait, a distance of fourteen miles to Cape Traverse in Prince Edward's Island, and that it works perfectly well. It is intended to form a part of his line to connect Newfoundland with the continent.

NEW-YORK LEGISLATURE.—The Legislature of this State meets January 4. Governor Seymour will be settled in a few days in the mansion now occupied by Governor Hunt, on the corner of Eagle and Elk-sts., Albany.

Municipal Elections.—HUNTSVILLE, ALA.—William Erchies, Jr., has been elected Mayor, and two Aldermen from each of the four wards.

The Post-Office and New-Jersey Railroads.—Correspondence of THE N. Y. Tribune.

WASHINGTON, Monday, Dec. 27, 1852. The reason why the Post-Office Department does not cause the New-Jersey Railroad to land the mails in Philadelphia in season to connect with the cars for Baltimore is, because it can't. The New-Jersey Railroad will not execute any contract with the Department for carrying its mails, and its officers say they do not want the job any how—that the local travel always pays expenses, and, therefore, they can afford to be independent. They carry the mail, however, as fast or slow as they please, and the Department recognizes and pays for the service, after deducting a good round sum for every failure.

The present Postmaster-General (Hon. Samuel D. Hubbard) has done everything that the law permits him to do, and all that his own private experience in business can suggest, to remedy the evil complained of, but to little purpose. In his late report he strongly recommends the establishment of a new post-route by Congress, as the only effective course that can be pursued.
